STATUS OF TTIC ACTIONS: JULY 1986I. Highlights

- o At the request of the chairman of the SIG/TT, TTIC and OSTP were asked in late July to co-chair an interagency working group to assess the political and national security implications of a National Science Foundation proposal that the US Government provide funds for research projects at the International Institute for Applied Systems Analysis (IIASA) in Austria. The US withdrew official funding and its membership in 1982 due to Soviet abuses of their participation in IIASA. A TTIC working group has been formed to respond to this request. The joint OSTP and TTIC report is to be submitted to the SIG/TT by 12 August. The SIG/TT will then submit its final report to the NSC by 19 August, as requested. [REDACTED] 25X1
- o A revised draft TTIC memorandum concerning TTIC's support of SDIO intelligence requirements was produced following comments by TTIC members on the initial proposal. This draft is being discussed with SDIO staff officials. [REDACTED] 25X1
- o Representatives from COMEX supported the Interagency Coordinating Council on US and Soviet Affairs (ICCUSA) Executive Secretaries Committee which met to discuss activities under current bilateral exchange agreements. The pace of activity has slowed, perhaps as a result of indecision in scheduling the next Summit meeting. The committee also discussed the need for trip reports to document exchange activity and the form which such reporting should take. [REDACTED] 25X1
- o The OSTP Committee on International Science, Engineering and Technology (CISSET) working group on Strategic Science, Engineering and Technology Cooperation and Technology Transfer heard briefings [REDACTED] 25X1
[REDACTED] by CIA/TTAC on Soviet covert 25X1
acquisition of strategic technologies and Soviet strategies for 25X1
international science and technology cooperation. [REDACTED]
